Research Activities

1. Ateya Iram, "Sentiment Analysis of Student's Facebook Post", Paper ID:198, Published in International Conference on Intelligent Technologies and Applications (October 23-25, INTAP 2018) CCIS-Springer book.
2. Ateya Iram, Sajid Habib Gill, "Similarity Measuring for Clustering Patient's Reports in Telemedicine", Paper ID:199, Published in International Conference on Intelligent Technologies and Applications (October 23-25, INTAP 2018) CCIS-Springer book.

Final Year Projects (FYPs) Supervision

❖ **march 2023 – continue** | Federal Urdu University Islamabad

"RAFIQUE FABRICS" is a mobile application that will be available on Android and iOS. The app will provide a user-friendly shopping experience by offering a vast collection of men's clothing fabrics, detailed product descriptions, and an easy-to-use ordering system. Additionally, the app will include a one-touch customer support system that enables customers to communicate directly with customer support agents to get information about fabric details, product suggestions, discount details, and assistance through WhatsApp, ensuring a physical shop-like experience from anywhere. Moreover, this app will also benefit customers who own fabric businesses, as it allows them to place bulk orders with wholesale prices. The Flutter SDK is used to develop the interactive mobile application. I supervised its development as the BS (CS) Final Year Project, during March 2023 to Feb 2024.

❖ **march 2023 – continue** | Federal Urdu University Islamabad

"GOLDEN LAND PROPERTIES & MARKETING" is a web-based Online Property Management System. This is software that takes care of everything that a real estate company wants to do. It is very strong and easy to use that makes quick booking of properties and account handling process. In marketing we are using social media accounts like Facebook and Instagram, so we can link these accounts to the website. Clients can view and book their favorite property online just after a few clicks. They can also pay the money online and get bills online. Some more features like that, what updates of other branches and the travelling to other branches only we have to open the website and check details i.e. employee update, account statement, tasks given to employee. PHP and MySQL are used to develop the web-based software. I supervised its development as the BS (CS) Final Year Project, during March 2023 to Feb 2024.

❖ **October 2023 – continue** | Federal Urdu University Islamabad

LMS OF SULTANA FOUNDATION BOYS HIGH SCHOOL which is a digital platform designed to facilitate and enhance the learning process in educational institutions. The main goal of creating an LMS is to provide a centralized and user-friendly platform that makes learning more accessible, engaging, and efficient for students, teachers, and administrators. With an LMS, we can streamline course management, offer interactive and multimedia-rich content and track student performance. It's all about leveraging technology to create a more effective and enjoyable learning experience. We aim to empower learners, support educators, and improve the overall educational journey. Front-End & Back-End (using tool (.NET) and Database (SQL Server)). I supervised its development as the BS (CS) Final Year Project, during October 2023 to March 2024.

❖ **October 2023 – continue** | Federal Urdu University Islamabad

In a fast-paced digital era, the online presence of businesses has become more critical than ever. As a developer, we are excited to present a solution to a pressing issue faced by "OVEN-NEST PIZZA SHOP." This issue revolves

around the lack of a streamlined and efficient online ordering system. Right now, the shop doesn't have a website, and this is a big opportunity to change that. This website will help the pizza shop grow by allowing people to order pizzas online. Our project aims to create a user-friendly website for a oven-nest pizza shop, providing customers with an easy way to order their favorite pizzas online. Begin front-end development using bootstrap and Reactjs. Implement the back-end using Django and MySQL for data management. I supervised its development as the BS (CS) Final Year Project, during October 2023 to March 2024.

❖ October 2023 – continue | Federal Urdu University Islamabad

THE PINDI FOUNDATION SCHOOL is a wonderful organization that has a big heart for helping children and young people who might not be able to go to school because their families are facing money problems. Imagine not being able to go to school because your parents can't afford to pay for books, uniforms, or school fees. It's a tough situation, right? Well, the Pindi Foundation School steps in to help out. They provide all the things you need for school without asking for anything in return. This school believes that every child deserves a chance to learn and grow, no matter how much money their family has. In a world where education is so important, the Pindi Foundation School is a shining example of how kindness and generosity can change lives. Front-End Development Tools: React, Back-End Development Tools: Node js and express Js, Database Management Tools: Mongo DB, Build Tools: Vs Code. I supervised its development as the BS (CS) Final Year Project, during October 2023 to March 2024.

Conferences Attended

▶ Artificial Intelligence (INTAP 2018)

- Islamia university, Bahawalpur, (Abbasia Campus)
- Presented the idea of the first research article related to my M. Phil research work.
- Presented the idea of the second research article.
- Three-Day Conference, 23-25 October 2018.
